

FACE MASK INFORMATION

TIPS FOR MEASURING FOR A FACE MASK

Wearing the correct size mask is essential for effective filtration and comfort. To find a good fit you may follow the steps below:

1. Measure from the middle of your nose to about a little over an inch/2.5cm under your chin.
2. Measure from your right cheekbone to your left cheekbone to find the width of the mask.

PUTTING ON A FACE MASK

A cloth face mask will provide the proper level of protection for your child. The adult versions may be too big, so try to find one that's child-sized or has adjustable straps.

1. Place the mask across your child's face, covering the nose and mouth. **Make sure it's a snug fit.**
2. Encourage your child to avoid touching the face mask or any area of the face.
3. When you get home, carefully remove the face mask by the straps, and have everyone thoroughly wash their hands.
4. Wash the cloth face mask between uses — in the washing machine or by hand with soap.
